An outstanding CD for the young student to listen, sing, tap, and play along with at the piano. The orchestrated songs on the CD feature children singing the lyrics, which has great appeal to the 5-6 year old beginner. Realism and Antirealism

Cornell University Press Throughout the past century, a debate has raged over the thesis of realism and its alternatives. Realism—the seemingly commonsensical view that all or most of what we encounter in the world exists and is what it is independently of human thought—has been vigorously denied by such prominent intellectuals as Jacques Derrida, Michel Foucault, Richard Rorty, Thomas Kuhn, Hilary Putnam, and Nelson Goodman. The opponents of realism, among them historians and social scientists who support social constructionism, hold that all or most of reality depends on human conceptual schemes and beliefs. In this volume of original essays, a group of philosophers explores the ongoing controversy. The book opens with an introduction by William P. Alston, whose writing on the subject has been widely influential. Selected essays then compare and contrast aspects of the arguments put forward by the realists with those of the antirealists. Other chapters discuss the importance of the debate for philosophical topics such as epistemology and for domains ranging from religion, literature, and science to morality.

Fooling Houdini

Magicians, Mentalists, Math Geeks, and the Hidden Powers of the Mind

Bond Street Books An exploration of the world of magic that teaches the reader many tricks--including how better to understand the real world. Alex Stone--journalist and part-time conjurer--is here to amaze you. But first he had to amaze his fellow magicians. Fooling Houdini is his fascinating, revealing, and nailbiting account of his attempt to win the 23rd World Championships of Magic, the "Magic Olympics," the largest and most prestigious competition of its kind. Alex Stone managed to qualify for entry and began preparing to astonish people who astonish others for a living. It didn't help his nerves that he was placed on the bill straight after Canadian magician Shawn Farquhar, winner of more magic competitions than anyone in history. Stone's preparations and participation provide his readers with in-depth exploration of the world of magic, and magic's meaning. He spills many professional secrets, arguing that what is important is to ask questions about what lies behind the tricks: how the mind perceives the world and parses everyday experience, about how the mind works--and why sometimes it doesn't, about why people need to believe. As we become more attuned to the limits of our own perception, we become better at distinguishing reality from illusion, at reading the angles and decoding the fine print, he says. We gain intuition and understanding into how people behave. We even learn ways to influence this behavior. This makes us less susceptible to all manner of deception. It is to gain and maintain this sixth sense that Alex Stone--a schoolboy prestidigitator--has continued performing magic well into adulthood. In Fooling Houdini he takes us into that other world, populated by truly astounding characters, and leaves us with a heightened sense of awareness about the supposedly real world.
