Educational Assessment in a Time of Reform

Standards and Standard Setting for Excellence in Education

Routledge Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough. If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement, and evaluation.

Total Diet Studies

Springer Science & Business Media Unless a food is grossly contaminated, consumers are unable to detect through sight or smell the presence of low levels of toxic chemicals in their foods. Furthermore, the toxic effects of exposure to low levels of chemicals are often manifested slowly, sometimes for decades, as in the case of cancer or organ failure. As a result, safeguarding food from such hazards requires the constant monitoring of the food supply using sophisticated laboratory analysis. While the food industry bears the primary responsibility for assuring the safety of its products, the overall protection of people's diets from chemical hazards must be considered one of the most important public health functions of any government. Unfortunately, many countries do not have sufficient capability and capacity to monitor the exposure of their populations to many potentially toxic chemicals that could be present in food and drinking water. Without such monitoring, public health authorities in many countries are not able to identify and respond to problems posed by toxic chemicals, which may harm their population and undermine consumer confidence in the safety of the food supply. From a trade perspective, those countries that cannot demonstrate that the food they produce is free of potentially hazardous chemicals will be greatly disadvantaged or even subject to sanctions in the international marketplace. The goal of a total diet study (TDS) is to provide basic information on the levels and trends of exposure to chemicals in foods as consumed by the population. In other words, foods are processed and prepared as typical for a country before they are analyzed in order to better represent actual dietary intakes. Total diet studies have been used to assess the safe use of agricultural chemicals (e.g., pesticides, antibiotics), food additives (e.g., preservatives, sweetening agents), environmental contaminants (e.g., lead, mercury, arsenic, cadmium, PCBs, dioxins), processing contaminants (e.g., acrylamide, polycyclic aromatic hydrocarbons, chloropropanols), and natural contaminants (e.g., aflatoxin, patulin, other mycotoxins) by determining whether dietary exposure to these chemicals are within acceptable limits. Total diet studies can also be applied to certain nutrients where the goal is to assure intakes are not only below safe upper limits, but also above levels deemed necessary to maintain good health. International and national organizations, such as the World Health Organization, the European Food Safety Agency and the US Food and Drug Administration recognize the TDS approach as one of the most cost-effective means of protecting consumers from chemicals in food, for providing essential information for managing food safety, including food standards, and for setting priorities for further investment and study. Total Diet Studies introduces the TDS concept to a wider audience and presents the various steps in the planning and implementation of a TDS. It illustrates how TDSs are being used to protect public health from chemicals in the food supply in many developed and developing countries. The book also examines some of the applications of TDSs to specific chemicals, including contaminants and nutrients.

Neoliberal Globalization and Reaction in the United States

Springer This book presents a critical analysis of the anti-democratic and pro-authoritarian ideologies that exist in rural communities in the United States. The author book also explores and recontextualizes existing research in rural education within this anti-democratic framework, as well as theorizing the consequences of this ideology as it takes place in the rural United States, specifically in regards to the physical and ideological shaping of rural communities to meet the needs of capitalist accumulation. Finally, it discusses the ways rural youth can reclaim the public sphere within their communities through critical education.

Public Examinations Examined

World Bank Publications High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for

employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

Faceless

Sub-Saharan Pub & Traders Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofo. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of poverty and violence that drive children to the streets and women to prostitution; and, from which, ultimately, no one in the society is free.

Inclusive Education in Italy

Springer Science & Business Media This book provides an innovative and thought-provoking analysis of the policy of integrazione scolastica from an inclusive perspective. Drawing on historical and empirical research methods the book arises out of an ethnographic study, which investigates the extent to which the policy of integrazione scolastica can be considered an inclusive policy. The author poses two fundamental questions: why are there episodes of micro-exclusion and discrimination against disabled pupils still taking place in regular schools after more than 30 years have passed since the enactment of such a progressive policy? Can the policy of integration lead to the development of inclusion in Italy? The research findings presented in the book indicate that exclusion and

discrimination towards disabled pupils in education do not result from a lack of implementation of the policy at a school level, rather from the perpetuation of dominant discourses, which construct disability as an individual deficit. The book does not deny the progress made in the country following the application of this anti-discriminatory policy; rather it challenges the hegemonic abilist culture and the traditional perspectives of disability and schooling that undermine the development of inclusive education. After having investigated the theoretical premises of the policy of integration, the author argues that this progressive policy is still rooted in a special needs education paradigm and that what was once a liberating policy has been transformed into a hegemonic tool which still manages, controls and normalizes disability leaving school settings and teaching and learning routines unchanged. She finally argues for a human rights approach for the development of an inclusive school for the 21st century. The book is an essential reading for academics, policy makers, researchers and students involved in education as it links ideological pressures to practical analyses.

Teaching and Learning Geography

Routledge This book provides a clear overview of current thinking on the teaching and learning of geography. It is an ideal companion to all students beginning a career in teaching the subject in secondary schools. The chapters are written by experienced teacher educators and bridge both theory and practice. The writers focus on the continuities, whilst setting them in the context of the changing curriculum. The book is divided into four parts. Part One examines the historical context of geography teaching. Part Two looks at issues of course planning, design, syllabuses and programmes of study. Underlying this section is the assumption that geography should not be considered in isolation from other subjects, but rather as part of a whole curriculum. Part Three concentrates on teaching and learning, and includes chapters on the use of maps, field work, IT and first hand experience within a community. The final section covers the issues associated with assessment, across the whole school age range.

Markets of English

Linguistic Capital and Language Policy in a Globalizing World

Routledge The global spread of English both reproduces and reinforces oppressive structures of inequality. But such structures can no longer be seen as imposed from an imperial center, as English is now actively adopted and appropriated in local contexts around the world. This book argues that such conditions call for a new critique of global English, one that is sensitive to both the political economic conditions of globalization and speakers' local practices. Linking Bourdieu's theory of the linguistic market and his practice-based perspective with recent advances in sociolinguistics and linguistic anthropology, this book offers a fresh new critique of global

English. The authors highlight the material, discursive, and semiotic processes through which the value of English in the linguistic market is constructed, and suggest possible policy interventions that may be adopted to address the problems of global English. Through its serious engagement with current sociolinguistic theory and insightful analysis of the multiple dimensions of English in the world, this book challenges the readers to think about what we need to do to confront the social inequalities that are perpetuated by the global spread of English

Emerging Issues in Economics and Development

BoD - Books on Demand Economics is about understanding the rational behaviour of economic agents (households, firms, industries and government) in their decisions to achieve best outcomes of their goals and aspirations. They collectively converge to achieve the utmost economic and social benefits for all in the country in terms of economic growth and development. Economic growth and development occur through efficient use of available resources to meet effective demand and social needs. The challenge that countries are facing is proper application of appropriate policy mix to optimize the opportunities of increasingly interdependent global economic landscape. For emerging economies, a multiple sector strategy that propels economic transformation is crucial. This needs to be predicated on robust macroeconomic policy framework that aligns with global production and consumption activities to drive economic growth process for achieving sustainable development.

Unexpected Joy at Dawn

Sub-Saharan Pub & Traders Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed

to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.

It examines the origins, nature, dynamics, and challenges of such movements as they aim to change dominant social, economic, and political institutions and structures across the globe. Departing from a theoretical introduction that explores major classical and contemporary theories of social movements and transformation, the contributions collected here use a class-based approach to examine key cases of social movements, rebellions, and revolutions worldwide from the turn of the twentieth to the early twenty-first centuries. Against this wide-ranging background, the handbook concludes by charting the varied and competing future developments and trajectories of social movements, revolutions, and social transformations.

City of Memories

Createspace Independent Publishing Platform City of Memories, a debut novel by Richard Ali, follows Faruk Ibrahim, his father, his lover and her mother as they negotiate peculiar Nigerian traumas. Towering above them is the story of Umami al-Qassim, a princess of Bolewa, and the feud, madness and death that attend her first love affairs. All four are bracketed by the modern city of Jos in central Nigeria, where political supremacy and perverse parental love become motives for ethno-religious crisis designed to destroy the Nigerian State. "(City of Memories) is an epic journey about identity, political and religious affiliations and above all, mistrust." - Alison Locke, author of Maysun and the Wingfish. "(City of Memories) is a fine attempt to witness and step up to collective memory. It is as much about a triumphant love affair as it is about a nation at the brink of collapse." - Emmanuel Iduma, publisher, Saraba Magazine. "(City of Memories) tackles the big question of what love really means, set during the time of religious and ethnic upheavals in Northern-Central Nigeria. A beautiful book of self-discovery by a young author to watch." - A. M. Bakalar, author of Madame Mephisto.
