*Apple continues its commitment to bringing cheap tablets to market, but with more than enough features for the majority. It is precisely this far-reaching approach to the audience and its price tag that makes the eighth generation iPad a candidate for top sales worldwide. Naming Apple products can be confusing at times, especially if you are unfamiliar with it. Although some products like the iPhone, add numbers to their name with each version. This is not the case with the iPad. To distinguish it from previous and future generations, it can be called iPad 8, iPad 8th generation, iPad 2020, student iPad 8 or 2020. The latter is because it is aimed heavily at children or the university audience. Much has happened since the day in January 2010 when legendary Steve Jobs launched the world's first iPad. Back then, it was an almost revolutionary device, if not as much as the iPhone. The design has hardly changed in recent years. It consists of an aluminum or steel case with rounded corners and a front part in which the frames and the home button were always present (with the exception of the latest iPad Pro and iPad Air). Apple Pencil User Guide 1 & 2

A Comprehensive Step by Step Manual Guide to Master Your Apple Pencil with Tips and Tricks

The Apple Pencil is an Apple-designed stylus that works with the Apple iPad. It is called the Apple Pencil because of its resemblance to a traditional pencil, although it has a definitive Apple-like design. It has a small (replaceable) plastic top that connects to a iPad display, a pencil-like body for holding and a loading mechanism. The original Apple Pencil has a Lightning connector, but the second-generation model is inductively charged via the "iPad Pro". Apple pencil is used instead of fingers for precise tasks like writing and sketching and can also be used to navigate the operating system. It is great for drawing, creating art, taking notes and performing similar tasks because it is precise, has palm rejection and gives sensitivity to pressure and inclination. In short, the Apple Pencil is designed to work like a traditional pencil, but instead of writing it on paper, you write on the PiPad display. You can put your right hand on the iPad while typing, a feature that has long been impossible for other styles to accurately reproduce.
