Essential NMRCGP CSA Preparation and Practice Cases

CRC Press **The Clinical Skills Assessment (CSA) of the new Membership of the Royal College of General Practice (nMRCGP) examinations can be a daunting test: candidates face assessment on an unknown situation by a 'patient' and assessor, however, help is at hand. This book has been written by a CSA examiner in concert with GP training programme members to help candidates approach the exam feeling prepared, calm and in control. It includes advice on preparation, consultation skills, how the assessment is marked, and 12 practice CSA cases, along with advice on how candidates can create cases with which to practise and assess each other. Clear, practical, and based on sound knowledge and proven techniques, this book will be essential reading for nMRCGP CSA candidates. 'Rhona is a passionate and compassionate educator with a strong sense of natural justice, and also a long-standing MRCGP examiner. She has developed an approach to understanding and preparing for the Clinical**

Skills Assessment (CSA) that is already tried, tested and proven. An approach that will enhance the candidate's ability as a GP at the same time as preparing them for the CSA.' - Simon Gregory in his Foreword

Psychiatric-Mental Health Nursing,

Second Edition

An Interpersonal Approach

Springer Publishing Company " The editors and contributors are to be congratulated for their clear effort to bring some degree of correction to the singular emphasis on pharmacotherapy. While it is clear that pharmacotherapy has a role to play in treatment, it is equally clear that the use of relationships as therapy has an equal if not more important role to play. There are several other features of this text that commend it to the student and the nurse seeking a review or a refresher course. First, the authors have done an excellent job in noting historical context. Second, [they] have made extensive use of the current research literature." - Grayce M. Sills, PhD, RN, FAAN

Thoroughly updated to correlate with DSM 5 diagnostic descriptions and QSEN guidelines, the second edition of this highly acclaimed undergraduate psychiatric nursing text features concrete strategies for establishing interpersonal relationships as the basis not only for working with the psychiatric patient population, but as a timeless foundation for all nursing practice. The text guides students through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice. Modules designed to foster growth in therapeutic use of self, including the importance of boundary management, are integrated with psychodynamic and current neurobiological theories to provide sturdy theoretical underpinnings for practice. A wealth of descriptive psychiatric diagnoses, QSEN criteria, and NANDA-based care plans, case scenarios, evidence-based practice, patient and family education tips, drug summary lists, and complementary and alternative therapy approaches populate the text. The main body of the book focuses on common mental illnesses and weaves both the psychodynamic and neurobiological concepts into evidence-based strategies for nursing interventions. Additional features such as examples of therapeutic dialogue and a "Consumer's Perspective" featuring an actual consumer's voice relating personal experience about living with a specific illness, provide further guidance in understanding and adopting a relationship-based approach to nursing. Web links facilitate quick access to additional information and NCLEX-style review questions prepare students for passing the NCLEX exam. New to the Second Edition: Revisions correlate to DSM 5 descriptions, QSEN criteria and NANDA nursing diagnoses Provides new information on psychopharmacology, compassion fatigue and a recovery model, use of informed consent, and cognitive behavioral therapy Presents updates on complementary and alternative interventions Includes expanded content on cultural and lifespan considerations related to mental health care worldwide

Key Features:
Focuses on interpersonal relationships and boundary navigation as the

foundation for practice Promotes psychodynamic and neurobiological perspectives within ISPN curricular guidelines Written by national and international experts in nursing education and psychiatric/mental health practice Includes digital student companion with key chapter concepts and critical thinking questions for practice situations Provides digital faculty resources including power point slides, expanded test bank, case studies, and critical thinking exercises

Japanese Patent Law Cases and Comments

Kluwer Law International B.V. **Japanese Patent Law Cases and Comments Edited by Christopher Heath & Atsuhiko Furuta** About the Editors: Christopher Heath is a judge at the European Patent Office and former head of the Max Planck Institute's Asian Department. Atsuhiko Furuta is an administrative judge at the Japanese Patent Office. He graduated with a Master's in Physics from the University of Tokyo and for two years was a guest researcher at the Max Planck Institute for Patent, Copyright and Competition Law in Munich. About this book: Japanese Patent Law is the first comprehensive work in English on all aspects of Japanese patent law presenting 66 cases with expert explanatory comments from academics, attorneys, judges and Japanese Patent Office officials. While not a common law jurisdiction, Japanese patent law in the past 20 years has been shaped by landmark decisions of the Supreme Court and, since 2005, the IP High Court. Approaching Japanese patent law via landmark decisions is arguably the most comprehensive manner of understanding the subject matter. Many of the cases appear in English for the first time. What's in this book: Following an informative introduction explaining the economic importance of the patent system for Japan, the cases cover such specific issues as the following: definition of an invention; assessment of prior art, novelty and inventive step; rights of co-inventors; disclaimers, corrections and amendments; scope and limits of patent protection; distinction between repair and reconstruction; doctrine of equivalents; domestic and international jurisdiction in patent matters; interim proceedings and measures; defence of invalidity; damage calculation; patent term extension

system; and utility models. Each case commentary follows a uniform structure, including background, summary of the facts, analysis and comparative remarks. The latter allows the reader to put developments in Japan in an international context. How this will help you: With the wealth of knowledge it makes available - leading Japanese patent cases in English translation, comparative case commentaries by leading experts on Japanese patent law, comprehensive analytical coverage of all aspects of Japanese patent law and coverage of related fields such as licensing, antitrust and civil procedure - this easy-to-use book will be warmly welcomed by patent attorneys and other practitioners (including Japanese patent practitioners advising foreign clients), patent academics and patent offices worldwide.

Medicolegal Issues in Obstetrics and Gynaecology

Springer **This book highlights minimum standards relating to the management of different conditions in the practice of Obstetrics and Gynaecology. The editors explore clinical governance issues, common causes of as well as ways to avoid litigation. The UK is experiencing a dramatic increase in medico-legal claims. The 4 main reasons for litigation are: accountability, the need for an explanation, concern with standards of care and compensation. However the decision to take legal action is determined not only by the original injury, but failure to provide information, an explanation and an apology. Insensitive handling of an injury and poor communication after the original incident increases the risk of litigation and erodes the patient-doctor relationship. Doctors almost never deliberately cause harm to patients, however increasingly claims are being defended successfully. This book is invaluable to clinicians and lawyers alike and raises awareness of how to avoid facing clinical negligence claims in our day to day practice.**
