Accounting Information Systems

Controls and Processes

John Wiley & Sons Accounting Information Systems provides a comprehensive knowledgebase of the systems that generate, evaluate, summarize, and report accounting information. Balancing technical concepts and student comprehension, this textbook introduces only the most-necessary technology in a clear and accessible style. The text focuses on business processes and accounting and IT controls, and includes discussion of relevant aspects of ethics and corporate governance. Relatable real-world examples and abundant end-of-chapter resources reinforce Accounting Information Systems (AIS) concepts and their use in day-to-day operation. Now in its fourth edition, this popular textbook explains IT controls using the AICPA Trust Services Principles framework—a comprehensive yet easy-to-understand framework of IT controls—and allows for incorporating hands-on learning to complement theoretical concepts. A full set of pedagogical features enables students to easily comprehend the material, understand data flow diagrams and document flowcharts, discuss case studies and examples, and successfully answer end-of-chapter questions. The book's focus on ease of use, and its straightforward presentation of business processes and related controls, make it an ideal primary text for business or accounting students in AIS courses.

Ethics and Sustainability in Accounting and Finance, Volume I

Springer This book discusses recent developments relating to ethical and sustainable issues in accounting & finance. Accounting is often seen as a technical discipline that records, classifies and reports financial transactions. However, since the financial information produced concerns all interest groups both within and outside the enterprise, accounting also has social characteristics and involves multi-faceted duties and responsibilities. As such, in addition to basic principles and accepted rules and standards in the field, this book focuses on the ethical aspects and fundamentals of this profession that accountants should also take into consideration, as this is the only way to build and preserve society's confidence in accounting and increase its social credibility.
