THE DJIEF HUNTERS, 26,000 YEARS OF RAINFOREST EXPLOITATION ON THE BIRD'S HEAD OF PAPUA, INDONESIA

MODERN QUATERNARY RESEARCH IN SOUTHEAST ASIA

CRC Press Two prehistoric cave sites on the Bird's Head of western New Guinea provide a detailed narrative of 26,000 years of human occupation of this area. During Late Pleistocene times, lower temperatures allowed a suite of montane animal species to descend onto the lowland Ayamaru Plateau. When the montane fauna receded during the subsequent climatic amelioration, people switched their hunting focus to a forest wallaby, known locally as Djief. Detailed analysis of this species' remains, including the reconstruction of their age profile, provides insights into why prolonged hunting of this species did not lead to its extinction. The wallaby population evidently thrived at its demographic maximum throughout the early and mid-Holocene, suggesting that human population densities, and therefore hunting pressure, were low until c. 5000 BP. This volume of Modern Quaternary Research in Southeast Asia offers a unique perspective on sustainable hunting in prehistory and provides intriguing insights into hunter-gatherer subsistence, tool manufacturing and use, the changing intensity of occupation of the sites, and environmental exploitation from Late Pleistocene times onwards in a lowland tropical region. It forms an important contribution to the current debate on the possibilities of human occupation of tropical rainforest before the advent of agriculture.

SHADOW VALLEY

Del Rey Steven Barnes's Great Sky Woman unveiled the world of a prehistoric people in the shadow of modern-day Mount Kilimanjaro. Now, in Shadow Valley, the astounding sequel, we follow the Ibandi people's odyssey through a land where everything has changed—a land from whose ashes will grow the roots of civilization and the enduring truths of love, family, forgiveness, and faith. After the catastrophic eruption of Father Mountain, the Ibandi are divided, desperate, and afraid. Most have followed the only person in whom they still believe: young Sky Woman, who was on the great mountain when it exploded and who, along with Frog Hopping, returned to tell the tale. Nurtured by an elder whose searing visions have left her blind, Sky Woman nonetheless doubts her own visionary powers as she follows a path she can hardly discern—across savannah and parched plains—to find a valley of plenty for a people on the brink of collapse. But in fact, Sky Woman and Frog were not the only survivors of the mountain's explosion. Another man has emerged from the destruction, vengeance pulsing in his veins, to lead a separate group of Ibandi into a vicious and reckless act of war. Soon these two strands of survivors will meet, through chance, desperation, and sheer willpower. In a world in which every moment is lived on the edge between life and death, where animal and human predators can strike in an instant, where the gods themselves seem lost, and dreams entwine with reality, a people's destiny rushes toward them. The Ibandi must make a last, violent stand against complete destruction. In this hypnotic, thrilling, and beautiful novel, Steven Barnes explores relationships between friends and lovers, leaders and followers, strangers and allies. At once visceral and soaringly insightful, Shadow Valley is about who we are as human beings today as seen through the wondrous prism of our distant past.

GUIDE TO THE GEOLOGY OF MOUNT DESERT ISLAND AND ACADIA NATIONAL PARK

North Atlantic Books This richly-illustrated, full-color guide to the geology of Mount Desert Island, Maine, the home of Acadia National Park, makes the spectacular scenery and rich geological history accessible to outdoor explorers, geology enthusiasts, and armchair travelers alike. The Guide grounds readers in basic geologic concepts before chronicling the unique history of the area from 550 million years ago to the present. Including information-packed self-guided trips with stops at 31 points of interest, this book is lavishly illustrated with 100 full color photos, maps, and illustrations that enhance appreciation of this national treasure. Duane and Ruth Braun relate the fascinating story of the region's formation, explaining how a slice of South America with Mount Desert Island bordering its southern side landed on the edge of North America to form Maine. Another piece of South America collided with this landing, causing Mount Desert Island to erupt violently in a ten mile wide volcanic caldera. The Island then underwent a long period of stream erosion culminating in a period of glacial erosion to form the present landscape. The exceptional scenery that resulted has attracted visitors from around the world. This book unlocks the many secrets of the formations, offering a deeper understanding of the land and its origins.

A NEW AND COMPLETE STATISTICAL GAZETTEER OF THE UNITED STATES OF AMERICA

DRAGON DRIVE: FULL BURN

Mitchell Koehler With his weapon left in shambles, Crios found himself in need of a new design, and a desperate desire to grow stronger. Given a chance to be trained by a Top-Ranked Guildie, Crios left Sassoon, unaware of the wild adventure he was about to face. For those of Dragon's Den he left behind, they would find their skills and newfound fame put to the test. The machinations of Celestial Rim will be set in motion, throwing the whole of Carcanas into chaos, and bringing to light exactly what it means to have the power of a dragon.

FOUND IN ALBERTA

ENVIRONMENTAL THEMES FOR THE ANTHROPOCENE

Wilfrid Laurier Univ. Press Found in Alberta: Environmental Themes for the Anthropocene is a collection of essays about the natural environment in a province rich in natural resources and aggressive in development goals. This is a casebook on Alberta from which emerges a far wider set of implications for North America and for the biosphere in general. The writers come from an array of disciplinary backgrounds within the environmental humanities. The essays examine the oil/tar sands, climate change, provincial government policy, food production, industry practices, legal frameworks, wilderness spaces, hunting, Indigenous perspectives, and nuclear power. Contributions from an ecocritical perspective provide insight into environmentally themed poetry, photography, and biography. Since the actions of Alberta's industries and government are currently at the heart of a global environmental debate, this collection is valuable to those wishing to understand the natural and commercial forces in play. The editors present an introductory argument that frames these interests inside a call for a rethinking of our assumptions about the natural world and our place within it.

GRENDDEL OMNIBUS VOLUME 1: HUNTER ROSE

HEADS OF STATE

ICONS, POWER, AND POLITICS IN THE ANCIENT AND MODERN ANDES

Routledge The human head has had important political, ritual and symbolic meanings throughout Andean history. Scholars have spoken of captured and trophy heads, curated crania, symbolic flying heads, head imagery on pots and on stone, head-shaped vessels, and linguistic references to the head. In this synthesizing work, cultural anthropologist Denise Arnold and archaeologist Christine Hastorf examine the cult of heads in the Andes—past and present—to develop a theory of its place in indigenous cultural practice and its relationship to political systems. Using ethnographic and archaeological fieldwork, highland-lowland comparisons, archival documents, oral histories, and ritual texts, the authors draw from Marx, Mauss, Foucault, Assadourian, Viveiros del Castro and other theorists to show how heads shape and symbolize power, violence, fertility, identity, and economy in South American cultures.

ECONOMICS WITHOUT ILLUSIONS

DEBUNKING THE MYTHS OF MODERN CAPITALISM

Currency "Economics is haunted by more fallacies than any other study known to man." -- Henry Hazlitt, Economics in One Lesson (1946) Every day economic claims are used by the media or in conversation to support social and political positions. Those on the left tend to distrust economists, seeing them as friends of the right. There is something to this, since professional economists are almost all keen supporters of the free market. Yet while factions on the right naturally embrace economists, they also tend to overestimate the effect of their support on free-market policies. The result is widespread confusion. In fact, virtually all commonly held beliefs about economics--whether espoused by political activists, politicians, journalists or taxpayers--are just plain wrong. Professor Joseph Heath wants to raise our economic literacy and empower us with new ideas. In Economics Without Illusions, he draws on everyday examples to skewer the six favourite economic fallacies of the right, followed by impaling the six favourite fallacies of the left. Heath leaves no sacred cows untipped as he breaks down complex arguments and shows how the world really works. The popularity of such books as Freakonomics and Predictably Irrational demonstrates that people want a better understanding of the financial forces that affect them. Highly readable, cogently argued and certain to raise ire along all points of the socio-political spectrum, Economics Without Illusions offers readers the economic literacy they need to genuinely understand and critique the pros and cons of capitalism.

THE HUNTING

Hachette Children's Genie and Rian thought they'd beaten The Fortress and stopped the dreadful experiments. But now someone even more ruthless has taken over, and wants to investigate why the experiments didn't kill Genie Magee. She is Fortress property, he claims - along with the other survivors. Now there's \$10,000 reward on their heads, armed roadblocks on the highway, and the dreaded threat of 'Mosquito' that can shut down their brainwaves by using their genetic information against them. There's only one possible escape from the bounty hunters with shotguns, and that's down the wild unforgiving river to a bleak future forever on the run. Or they must turn and face The Fortress, find out its secrets, and use them against it. Seize their lives back, and fight for their very right to exist!

'Forget Bella and Edward. Genie and Rian are the new IT couple in the teen fiction world!' Kooky Toon Book Corner blog
